Test document. This is not a real program; Nasup's crawler reads it for drills.

Canary Manufacturing Training Grant: program guidelines

1. Administration

The Canary Manufacturing Training Grant is administered by the Canary Department of Commerce. Awards are approved by the Canary Economic Development Board. The program is authorized by Canary Code section 12-345.

2. Award

The program is a reimbursement grant. Grants cover 50% of eligible training costs, up to $30,000 per company per year. Total awards statewide may not exceed $2,000,000 in any fiscal year. As of October 1, 2026, $1,200,000 remains available for the current fiscal year.

Awards are not refundable tax credits and may not be transferred or sold to another company. Unused award amounts may be carried forward for up to 3 years. Each award agreement has a term of 2 years.

3. Eligibility

Applicants must be manufacturers with a facility in the program area and at least 10 full-time employees. Companies with more than 500 employees are not eligible.

4. Applying

The program is open. Applications are accepted in quarterly rounds. Applications for the next round must be submitted by May 28, 2027. Applicants must apply before the training begins; training that starts before the application is approved is not eligible. A non-refundable application fee of $250 is due with each application.

Applicants must submit a training plan, a budget, and proof of employment for each trainee. Awardees must file a final report within 60 days after the training ends.

5. Other incentives

Manufacturers that file the Canary quarterly withholding return already meet the base registration for this grant: the filed return counts as the registration, so most eligible manufacturers are already registered without a separate step.

Companies that claimed the Canary Job Creation Credit for the same employees in the same year may not receive this grant for those employees.
